

DRAFT ACTIONS

Take action at HOME or WORK

Learn about renewables, electrification and energy efficiency: Access practical, trusted information about solar, batteries, going all-electric and improving energy efficiency from peers, community groups and government programs.

Support local wildlife: Protect existing habitat and trees while adding more native planting and increasing tree canopy across homes, nature strips and workplaces.

Reduce waste, recover more: Play your part to improve how you buy, reuse and sort resources, supported by education from peers, community groups and government programs.

Take action TOGETHER

Share what works: Neighbours, clubs, schools and businesses share what's worked, enabled by access to trusted information, tools, conversations and events.

Support children to walk and ride safely to school: Work together to enable and encourage fun, local active transport.

Support adults to walk and ride more often: Work together to enable and encourage everyday active transport.

Enable and support sharing of things across the community: Work together to borrow more, buy less and save money through initiatives like a 'library of things' and community sharing projects.

Empower young people in Unley: Enable young people to have a voice, influence change and contribute to climate action across the community in different ways.

Take action to SUPPORT the COMMUNITY

Support creation of an environment hub: Enable a space for practical information and connecting to local groups.

Enable cool and warm spaces to be publicly available: Public facilities available for cool spaces in summer and warm spaces in winter.

Grow greener streets and shared green spaces: Create more green spaces like pocket parks and habitat corridors for people and wildlife, and plant more trees.

Expand EV charging across Unley: Support and deliver a range of EV charging options across Unley.

Take action to ADVOCATE TOGETHER

Advocate for electric, efficient properties: Advocate to State and National Government to phase out new gas connections, support electrification, energy efficiency and thermal comfort outcomes.

Advocate for better public transport: Advocate to State Government to improve public transport services across Unley.

Advocate for greener, more biodiverse urban spaces: Advocate to State Government for stronger greening, biodiversity and water security outcomes in areas where it has responsibility or influence.

Advocate for renters and strata communities to access upgrades and renewables: Advocate to State Government to help renters and strata communities overcome barriers to electrification, energy efficiency, thermal comfort and access to renewable energy.
