

CHARLES WALK AND LITTLE CHARLES STREET

The proposed improvements aim to prioritise people walking and riding bikes across Little Charles Street, while also improving visibility and safety at the nearby intersections with Palmerston Place and Charles Lane.

The improvements include:

- **Prioritising path users** through a priority zebra crossing across Little Charles Street.
- **Slightly realigning the path** to improve the visibility and placement of the removable bollard, noting often the bollard was folded on the ground with no clearance to passing cyclists and people walking.
- **Improving landscaping** to enhance sight lines at the intersection, including the removal of one tree to accommodate the slight path realignment.
- **Improving lighting** at the intersection to improve visibility for people walking and riding bikes, particularly at night.
- **Installing new line marking** at the intersections of Charles Street with Palmerston Place and Little Charles Street to improve sightlines and safety.

- 1 Priority zebra crossing
- 2 New removable bollards and improved path delineation at bollards
- 3 One tree removed
- 4 One-way operation from east to west, with parking changed to meet Australian Standards. 26 parking spaces provided including an accessible space
- 5 Exit only from parking
- 6 Painted corner treatments and stop line
- 7 Paint only treatment island
- 8 Improved landscaping to enhance sight lines and visibility of approaching pedestrians and cyclists
- 9 Upgraded lighting to improve safety and visibility at the proposed zebra priority crossing at night
