

CHARLES WALK AND CLELAND AVENUE

The proposed improvements are designed to make the intersection safer, clearer and more convenient for people walking and riding bikes.

The improvements include:

- **Prioritising path users** with green pavement through the intersection to clearly highlight the crossing and priority.
- **Improving the path alignment** to provide a smoother connection through the junction.
- **Improving lighting** at the intersection and along the section near Council’s nursery to improve visibility.
- **Improving line marking and wayfinding** to provide clearer guidance for people using the path.
- **Upgrading the existing removable bollards** to continue restricting vehicle access along the path to authorised service vehicles only.
- **Maintaining existing vehicle access** for nearby local residents.

1 Priority crossing with Give Way signs

2 2 parking spaces removed to meet Australian Standards for priority crossings

3 Crossing alignment improved and landscaped area increased

4 New removable bollards and improved path delineation at bollards
